WORK EXPERIENCE

Software Engineer — Faithlife

March 2020 - PRESENT

- Led the development of a major feature for the latest release of the Logos app, which was highly valued by customers and contributed to a record-breaking increase in profits
- Maintained and implemented software features on multiple platforms, including macOS, Windows, and the web, ensuring seamless user experience and functionality
- Strengthened team collaboration and improved project outcomes through effective leadership skills developed by mentoring interns and leading projects

Software Engineering Intern — Faithlife

May 2019 - Aug 2019

- Contributed to building and maintaining the company's flagship social web platform
- Spearheaded the integration of a new dashboard feature that streamlined access to multiple internal products, resulting in increased user engagement and retention

iOS Development Intern — Olive Tree Bible Software

Sept 2018 - May 2019

- Integrated new features into the app such as Siri Shortcuts, Vision Accessibility support, and ML model that leverages Natural Language Processing

Web Development Intern — 14Four

May 2018 - Aug 2018

- Acquired and applied new skills in the internship project including creating a web app for cooking recipes and measurement conversions
- Contributed to various client projects such as websites and banners upon request

Google CodeU Program — Google Developers

Feb 2018 - May 2018

- Collaborated with a team of 4 students and a Google Software Engineer as a mentor
- Developed a chat web application for CS college students
- Integrated user profile page and worked as a UI Lead
